Software Engineering Technology student at the Vocational College, Universitas Gadjah Mada. Experienced in web application development using Laravel with a deep interest in backend development.

EDUCATION

Universitas Gadjah Mada , Yogyakarta <i>Bachelor of Applied Science, Software Engineering Technology</i> GPA 3.81 of 4.00 (5th Semester)	Jul 2023 - Present
SMA N 1 Ajibarang , Banyumas <i>Mathematics and Science</i>	Jul 2020 - Jul 2023

WORKING EXPERIENCE

PT Parama Data Unit , Yogyakarta <i>Full Stack Developer & AI Engineer Intern</i> - Developed an AI-powered Document Management System utilizing Retrieval-Augmented Generation (RAG) to facilitate intelligent and automated document querying. - Built a responsive and intuitive user interface using Next.js to provide a seamless document management experience for users. - Utilized Express to manage API request lifecycle and optimize the data exchange bridge between frontend and backend interfaces. - Designed a high-performance backend using FastAPI (Python) to drive the RAG pipeline and securely integrate Large Language Models (LLMs) via Ollama.	Feb - Jun 2026
PT Jaya Perkasa Mandalika , remote <i>Web Developer Intern</i> - Handled a Multi-tenant SaaS platform using Laravel, - Enabling centralized data management for multiple clients. - Collaborated with the team via Git/GitHub to implement dynamic data rendering and fix frontend-backend integration issues.	Oct - Nov 2025
Digital Hero Indonesia , remote <i>Web Developer Intern</i> - Developed a web-based Rental Management System using the Laravel framework. - Collaborated effectively within an Agile Scrum team, participating in sprint planning and daily standups to meet project deadlines. - Managed source code and version control using Git and GitHub, ensuring smooth collaboration and code integration.	Jul 2022 - Dec 2023

PROJECT AND ACTIVITIES

AI-Powered Telegram Chatbot for Hotel Reviews , - Designed and implemented an automated chatbot workflow using n8n to analyze and process hotel review data. - Constructed complex logic flows and integrated external APIs to enable real-time interaction between the Telegram bot and the database. - Collaborated with a team to refine the bot's response accuracy and manage the underlying database structure.	Aug -Nov 2025
--	---------------

Tech Stack: n8n, Telegram API, OpenAI/LLM API, SQL.

NutriTrack x HealthMap (Interoperable Nutrition Monitoring System),

Jun 2025

- Developed an interoperable web ecosystem integrating two distinct platforms (NutriTrack and HealthMap) via a shared database architecture to support malnutrition monitoring.
- Engineered robust RESTful APIs to serve as the communication backbone, ensuring seamless data synchronization and consistency between both systems.
- Contributed to the frontend development by implementing efficient API fetching logic and state management to ensure accurate real-time data visualization.

Sports Field Rental Management System,

Dec 2024

- Developed a comprehensive web-based booking system using the **Laravel** framework, streamlining the reservation process for sports facilities.
- Architected and implemented the **relational database schema (MySQL)** to handle bookings, user schedules, and field availability efficiently.
- Collaborated in a development team to ensure seamless integration between the frontend interface and backend logic.

Tech Stack: Laravel, MySQL, PHP, Tailwind, Alpine JS.

ORGANIZATIONAL & COMMITTEE EXPERIENCE

Media & IT Support Staff, Ramadhan Di Kampus (RDK) UGM 1445H (Mar 2024)

Mar 2024

- **Technical Operations:** Managed live streaming sessions using OBS Studio, ensuring high-quality audio and visual output for daily Ramadan webinars.
- **Troubleshooting:** Set up and configured camera equipment, audio systems, and lighting, handling on-the-spot technical troubleshooting during live broadcasts.

Creative Media Staff | Jamaah Shalahudin UGM

Oct 2023

- **Content Production:** Produced and edited educational video content using video editing software, maintaining consistency with the organization's branding.
- **Documentation:** Responsible for documentation and visual archival of various organizational activities and events.

Head of Media Division | SMANA Masuk Kampus 7.0 (Edu Fair)

Dec 2023

- **Leadership:** Led and coordinated the media division staff, ensuring clear task distribution and adherence to project timelines.
- **Project Management:** Managed the production of all visual assets for the event, including proposals, banners, and social media feeds, contributing to successful event branding.
- **Collaboration:** Acted as the main liaison between the media team and other divisions to ensure cohesive communication strategies.
